windream presents advantages of electronic invoice verification at the conference Digital Finance & Controlling 2020

Bochum. This year, windream GmbH will again participate in the Digital Finance & Controlling as a partner. The conference, which is organised by the analyst house BARC, will take place as an online event for the first time on May 27 and 28, 2020. On the second day, windream GmbH will give a presentation which will show how companies can save a lot of time and optimise their business processes with a digital invoice processing. Participation in the Digital Finance & Controlling 2020 is free of charge.

A modern, IT-supported invoice management plays an increasingly important role in companies - regardless of their size. In the past, incoming invoices were received as paper documents by mail, stamped and forwarded as copies to the departments involved. Nowadays, modern software-based solutions take over these processes.

On this background, the ECM-specialists Vincent Fröhning and Carolin Wasenmüller of windream GmbH will show how companies can automate recurring workflows for capturing, processing and releasing invoices with windream Invoice Management in the context of Digital Finance & Controlling 2020.In this context, the two speakers will explain the advantages which come along with it, e.g. considerably shorter processing times, a fast return on investment (ROI) and an automated electronic archiving of invoices - including fast retrieval and a smooth data exchange with financial accounting.

The presentation will take place on 28 May from 9:55 a.m. and can be followed live over the Internet free of charge after prior registration. Participants will have the opportunity to ask their questions live to the speakers and to interact with windream GmbH via their virtual presence on both congress days.

About windream GmbH
windream GmbH develops and distributes the windream ECM-system. windream GmbH currently employs 85 people and supports a network of about 250 distribution, integration and cooperation partners throughout Europe, the USA, South America, Africa as well as Australia and New Zealand. International enterprises such as Babcock Noell, Deutz AG, the DFS Deutsche Flugsicherung (German Air Traffic Control), Swisscom, Koenig & Bauer and Deutsche BKK are included among the company's customers.

About the windream Enterprise Content Management System
windream, protected by patent since 2003, is counted amongst the leading solutions for acquiring, administering and archiving electronic documents in the office sector as well as in the field of SAP-integrated applications. windream is the first ECM-system worldwide to be integrated into an operating system.
The Standard Edition is generally used by smaller and medium-sized companies and the Business Edition by large enterprises. A whole variety of integrations into third-party products extend the windream product portfolio. Integrations into ERP-, resource management, financial accounting, knowledge management, groupware and imaging / data capturing solutions as well as integrations into different branch-specific software systems are included among the product range. windream has achieved a first-class result as a participant in the BARC studies "Enterprise Content Management" in all test disciplines.
